

EASY GRIP 101

BANANA PLUGS

Banana plugs are used to finish off the exposed ends of speaker cable and make them easier to plug into your receiver or speakers.

These speaker banana plugs are the open screw type and can accept bare wire, spades, or other banana plugs.

Banana plugs for speaker wire are sized to fit speaker cable from 12 to 18 AWG. Isolates wires which keep them from shorting out and keep the wire connection secure, help your installation to look cleaner.
