

Alpha 3 Red Edition

8k HDMI with eARC

8K AOC HDMI Cable for Long-Distance Brilliance

Built for ultra-high-definition over extended distances, the Tono Alpha 3 Red Edition is a premium AOC (Active Optical Cable) solution for 8K HDMI transmission beyond 10 meters. Leveraging fiber optic technology, it ensures zero signal degradation, high-speed bandwidth, and flawless visual clarity even at lengths up to 100 meters.

Key Features:

- 8K @ 60Hz | 4K @ 120Hz resolution support for cinema-grade visuals
- AOC Technology — fiber optic core for long-distance transmission with no loss
- CL3 Rated Jacket — fire-resistant and in-wall installation safe
- Gold-Plated Connectors with precision shielding for optimal contact
- Plug-and-Play — no external power required
- Directional Design with clearly marked Source and Display ends

Perfect for home theaters, auditoriums, conference rooms, and commercial AV setups where cable distance matters.

CL3 fire rating is tough and wear-resistant

CL3 soft wire body, anti-pulling, bending resistance, no fear of fire, foot stepping, wall burial, extrusion

Built to Withstand Heat, Pressure, and Every Installation Challenge

The Tono Alpha 3 HDMI cable features a CL3 fire-rated jacket, engineered for tough in-wall and high-risk environments. With superior resistance to bending, pulling, fire, and abrasion, it's ideal for professional AV setups where safety and longevity are non-negotiable. Whether it's wall burial, foot traffic, or high-heat zones—this cable stands strong.

Gold-Plated Connectors for Long-Term Performance

The Tono Alpha 3 Red Edition features precision-engineered gold-plated HDMI connectors that resist corrosion, rust, and oxidation. Designed for longevity and stable signal transmission, this cable ensures uninterrupted 8K performance even after years of use in demanding environments.

No rust and durable

Gold-plated connectors, corrosion resistance and oxidation resistance, long-term use, the signal still transmits stably
