

TONO

Digital Signage

EXPLORE OUR STYLISH DIGITAL SIGNAGE SERIES

Leverage Retail Experience

Digital signage is a powerful tool that can greatly enhance the retail experience for customers. By using screens and displays throughout stores, businesses can share eye-catching promotions, product information, and brand messages. This technology allows retailers to quickly update content, ensuring that shoppers always see the latest offers and news. Digital signs can guide customers through the store, highlight special deals, and even show product demos. They create a more interactive and engaging shopping environment, which can lead to increased sales and customer satisfaction.

We help our customers choose the right digital signage for various applications.

ELEVATE YOUR SPACE WITH OUR DIGITAL SIGNAGE

Frame Series
32"-42"

Slate Series
32"-65"

Obel Series
32"-65"

Frame Series

Easel Style

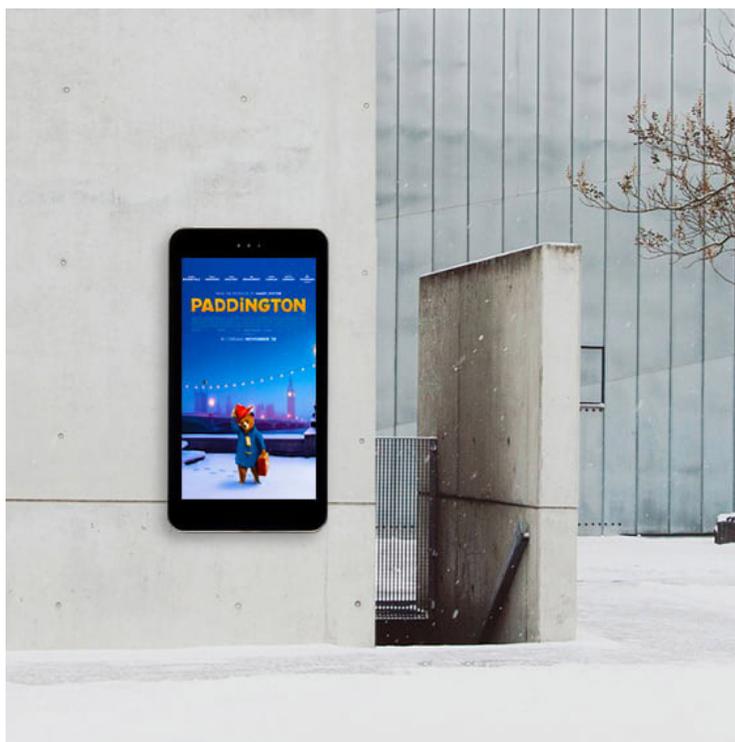

The Tono Frame Series Easel type digital signage offers a stylish and practical solution for displaying digital content.

Obel Series

Totem Style

The Tono Obel Series Totem style digital signage is a modern way to show information in public spaces.

Slate Series

Wall Mounted

The Tono Slate Series Wall mount style digital signage offers a sleek and modern way to display information. These screens can be easily attached to walls, making them perfect for offices, schools, and public spaces. They show clear, bright images and videos that catch people's attention. Users can update the content quickly, allowing for real-time information sharing. The slim design of these screens helps them blend in with any decor while still standing out when needed.
