

Z Series Projector Screens

High End Tab Tensioned

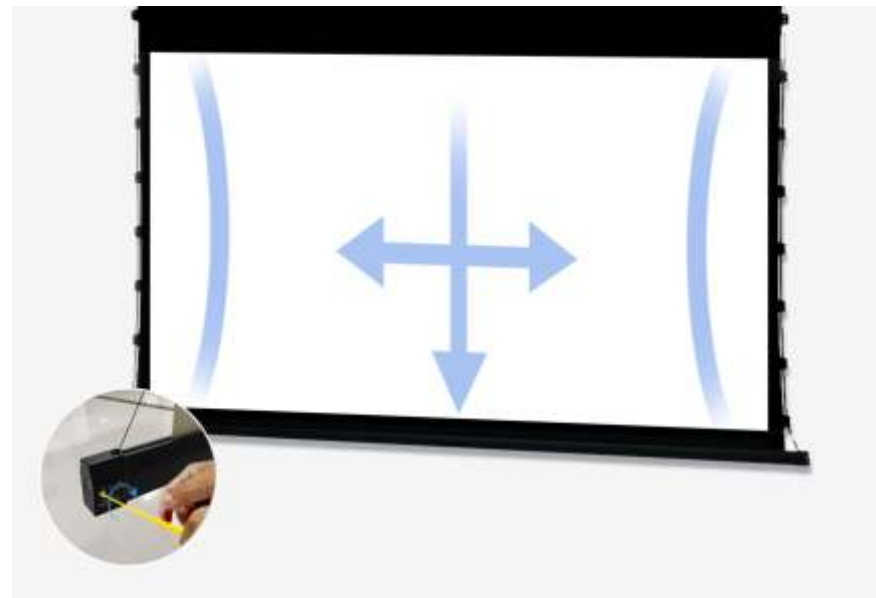

Wide 156° Viewing Angle

Enjoy stunning clarity and color accuracy from nearly any angle. The Tono Z Series Tab-Tensioned Screen delivers an expansive 156° viewing experience, ensuring that every seat in the room—center or side—gets the full impact of your visuals. Perfect for family movie nights, home theaters, and immersive group viewing.

Tab-Tensioned Flatness Control

Keep your screen perfectly flat and wrinkle-free. The Tono Z Series features a precision tab-tensioning system with adjustable alignment to maintain uniform surface tension in all directions. This ensures distortion-free visuals with no edge curling—delivering a flawless viewing experience every time.

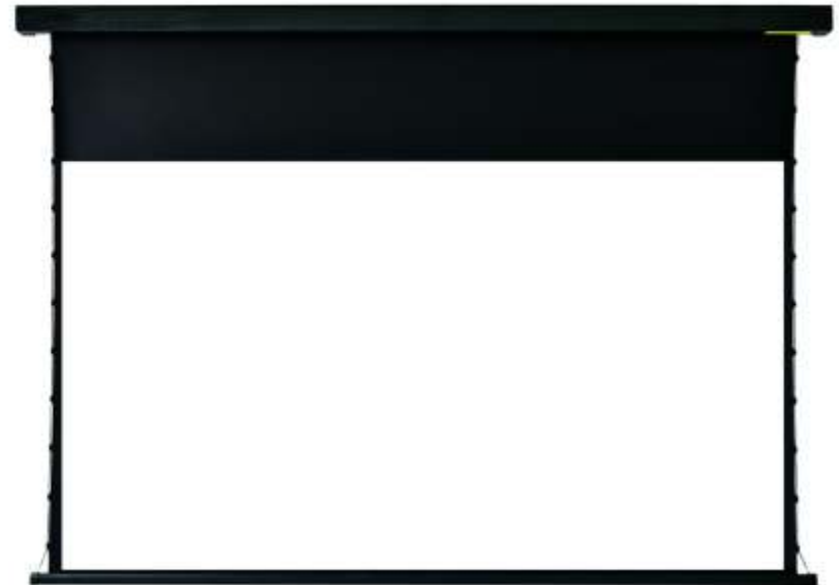

Cinematic Precision. Audiophile Approved.

The Tono Z Series is your perfect choice for a dedicated home cinema setup. Available in Matte White, White Micro-Perforated, and Woven Acoustically Transparent options, it supports immersive visuals and superior sound integration.

Matte White: Enhanced brightness and true color fidelity with a black backing to block ambient light penetration.

Micro-Perforated & Woven: Place speakers directly behind the screen without compromising audio clarity—ideal for invisible sound setups.

Best suited for light-controlled environments, the Z Series delivers a true theatre experience with crisp visuals and immersive sound—beautifully tensioned for a perfectly flat surface every time.

Flexible Mounting & Easy Adjustment

Designed for quick, precise installation.

The Tono Z Series comes with a tool-free sliding rail (1), allowing you to shift the mount horizontally with ease. Secure positioning is ensured with adjustable brackets (2), while the built-in fine-tuning screw system (3) lets you level the screen perfectly—even after mounting.

Perfect for both ceiling and wall installations, this design ensures a seamless and stress-free setup.

Smart Connectivity for Seamless Control

The Tono Z Series screen offers advanced integration options for modern AV systems. Equipped with a universal multi-function port, it supports:

- RS 485 / RS 232 — for professional control systems
- DCAMX — for seamless automation integration
- Wired Trigger — auto screen drop with projector power
- Wide Voltage Input — AC 90V to 240V compatibility

This ensures effortless syncing with home theaters, media rooms, or smart environments.
